

NANO CPI2

THE MOST ROBUST AND ECONOMICAL OPTION FOR FUELS CONTROL IN DEMANDING ENVIRONMENTS

Automate fuel shipments simply and economically.

An economic solution for the control of dispatch to fleets in highly demanding environments such as remote self-consumption or as a solution on board a truck or a mobile tank.

FEATURES

- Solid state platform with no moving parts, robust and reliable.
- Remote access to facilitate the service.
- PAM1000 standard interface emulation.
- Compatible with Ationet®
- Easy data export.
- Connection with tank monitoring consoles.
- Interface with RFID Rings.
- SMD mounting without Throughhole components susceptible to vibration damage.
